DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3. **Claims 1-3** are rejected under 35 U.S.C. 102(b) as being anticipated by Mascenik (hereinafter "*Mascenik*"), U.S. Patent Number 5,631,882.

Regarding **claim 1**, *Mascenik* discloses a recording medium apparatus comprising (FIG. 3, element 31): a storage section, which is provided in said recording medium apparatus, for storing a plurality of recording media (FIG. 3, element 19); an

ejection slot for ejecting the recording media stored in said storage section to outside of said recording medium apparatus (FIG. 3, element 14); a designation section to designate recording media which is to be ejected through said ejection slot out of the plurality of recording media stored in said storage section (FIG. 7, col. 8, lines 31-54); and a control section for consecutively executing ejection of said recording media designated through said designation section in sequence (FIG. 8, element 2, col. 6, lines 24-31, see also Abstract).

Regarding **claim 2**, *Mascenik* further discloses wherein said designation section is configured to designate recording media to be ejected for each type (recordable and erasable floppy disks) of recording media (col. 12, lines 36-41).

Regarding **claim 3**, *Mascenik* further discloses a recording medium ejection method of ejecting designated recording media from a storage section which stores a plurality of recording media, comprising the steps of: designating recording media to be ejected out of the plurality of recording media stored in said storage section; and consecutively executing ejection of said designated recording media in sequence (col. 8, line 31- col. 9, line 5).
